

# I want to talk about...

Overleaf is an example of a topic prompt chart. This type of resource is designed to support patients whose speech may be difficult to understand, to be able to cue their communication partner in to topics that they want to talk about or have questions they want to ask.

These can be easily adapted to incorporate various different topics by adding different photos or symbols.

family

my health

sleep

friends

feelings

exercise

food

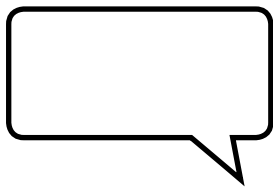

my medicine

my money
