What is Happening?

For queries or guidance for support contact:
InclusiveCommunication@nottshc.nhs.uk

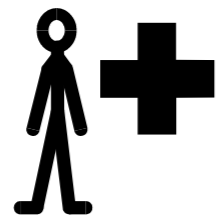

This is an example of a resource which supports a patient who may have difficulty expressing themselves to communicate their needs and wishes. The patient is encouraged to point to the symbol or photos to communicate. Where a patient is unable to point to the frame, staff may need to follow their eye gaze to locate which image they are selecting.

positive
about integrated healthcare

This particular example uses vocabulary based around the topic of staying in hospital. This can be easily adapted around various other topics by adding different photos or symbols.
